SKILLS

Web Basics
HTML, CSS, JavaScript

Programming
Python (Basic), C/C++

Tools
Git, VS Code, WordPress

EDUCATION

2024 – 2028
BE in Computer Engineering
Pulchowk Campus, TU

2021 – 2023
Higher Secondary (+2)
Kist College (GPA: 3.86)

LANGUAGES

English, Nepali, Hindi, Bajika

ABOUT ME

I am a computer engineering student at Pulchowk Campus. I enjoy learning how computers work, building simple websites, and writing about technology. I am currently focusing on improving my coding skills and learning about data.

EXPERIENCE

Data Science Fellow May 2025 – Present
Code for Nepal

- Learning the basics of Python for data tasks.
- Using Pandas and Jupyter Notebooks to look at simple datasets.

Blogger 2024 – Present
Personal Tech Blog

- Writing simple articles about what I learn in engineering and programming.
- Managing a basic website to share helpful tips with other students.

PROJECTS

Simple Blog Site
A basic website built to practice HTML, CSS, and some JavaScript features.

Weather Forecast App
A small project that uses basic Python to show weather information.

Student Record System
A simple C++ program to manage and store student data in a list.

Conclusion:

In this lab, we focused on the fundamentals of web development, specifically through creating a simple, responsive web page using HTML5 and CSS3. By designing a clean layout with a structured header, main content area, and footer, we were able to apply core concepts such as semantic HTML and responsive design principles. The project demonstrated the power of basic web technologies in building modern, visually appealing websites that adapt to different screen sizes. This lab provided a solid foundation for further exploring more advanced topics like CSS styling, JavaScript, and dynamic web applications.
